Spessartine Garnet

Spessartine is a member of the garnet group of minerals. The name was given to this garnet in 1832 and refers to the Spessart Mountains of Germany where it was originally found. It occurs in a range of colors, from orangy red to bright orange. Important sources of this garnet include Namibia and Tanzania.

Characteristics

Mineral	Mohs Hardness	Toughness	Birthstone
Garnet	6.5-7	Good	January

Details

Item Description

One loose stone

Weight

1.75 carats

Measurements

6.71 x 6.69 x 4.53 mm

Shape

Octagonal

Color

Orange

Transparency

Transparent

Cutting Style

Modified Brilliant Cut

Results

Species

Spessartine Garnet

Comments

None
